Srinivas Thogaracheeti

Azure Data Engineer

Srinivas05tech@gmail.com | +91-9618801484

Azure Data Factory | Databricks | Microsoft Fabric | ADLS | Delta Lake | PySpark | SQL | ETL/ELT

PROFILE SUMMARY

Azure Data Engineer with around 6+ years of experience designing and delivering production-grade data platforms across Microsoft Azure and Microsoft Fabric. Hands-on expertise in Azure Data Factory, Azure Databricks, Microsoft Fabric, PySpark, SQL, ADLS Gen2, OneLake, and Delta Lake, with a focus on metadata-driven ETL/ELT, Medallion architecture, incremental processing, and reusable ingestion frameworks. Built metadata-driven ingestion solutions supporting 200+ source tables and delivered analytics-ready data platforms for enterprise clients across manufacturing and FMCG.

TECHNICAL SKILLS

Category	Technologies
Cloud & Data Platforms	Azure Data Factory, Azure Databricks, Microsoft Fabric, Fabric Pipelines, Fabric Notebooks, ADLS Gen2, OneLake, Azure Blob Storage, Delta Lake, Azure Key Vault, Logic Apps
Programming & Querying	PySpark, SQL (T-SQL), Python
Data Engineering	ETL/ELT, Medallion Architecture (Bronze/Silver/Gold), Metadata-Driven Frameworks, Incremental Load, Data Ingestion
DevOps & Tooling	Azure DevOps, Git, CI/CD Pipelines, JIRA

EMPLOYMENT HISTORY

Organisation	Role	Duration
VSM Infotech Pvt Ltd	Sr. Software Engineer	Aug 2022 – Present
Capgemini Technology Services India Ltd	Consultant	Feb 2022 – Aug 2022
Yokra Technology Solutions Pvt Ltd	Software Engineer	Sep 2020 – Feb 2022

PROFESSIONAL EXPERIENCE

Client: Robertshaw | Project: Robertshaw DAP

Environment: Microsoft Fabric, OneLake, Fabric Pipelines, Fabric Notebooks, PySpark, MS SQL, Azure SQL, Plex (source), SFTP

- Designed and implemented end-to-end Lakehouse (Medallion) architecture on Microsoft Fabric using OneLake, loading source data into Bronze (Parquet), Silver, and Gold layers for downstream analytics.
- Built a scalable, metadata-driven ingestion framework supporting 200+ source tables, reducing per-table pipeline development time through reusable components and standardized ingestion patterns.
- Developed a metadata-driven Fabric notebook framework for dynamic, schema-aware table loading, enabling standardized ingestion with minimal manual configuration.
- Designed Silver-layer dimension and fact transformations and built curated Gold datasets for direct consumption by reporting and analytics teams.
- Monitored production pipelines, triaged failures, implemented fixes, and maintained SLA compliance and data freshness.

- Collaborated directly with business stakeholders to translate complex data requirements into reusable technical deliverables.

Client: P&G | Project: OPAS

Environment: Azure Data Factory (ADF), Azure Databricks (ADB), ADLS Gen2, Delta Lake, Azure SQL, SQL Server 2019, Git

- Built a dynamic ADF pipeline to identify and extract the latest files from SFTP, automatically loading them into the ADLS Bronze layer with reusable ingestion logic.
- Developed a Databricks Silver-layer notebook implementing incremental Delta loads, data type standardization, and data quality cleansing.
- Created a Databricks Gold-layer notebook to apply business transformation logic and deliver curated Delta tables ready for reporting and analysis.
- Led CI/CD pipeline management using Azure DevOps and Git, supporting controlled deployments and consistent delivery across environments.
- Conducted code reviews and collaborated with client stakeholders to validate requirements, maintain technical standards, and align solutions with business expectations.

Client: Commonwealth Rolled Products | Project: CRPDL (CRP Data Lake)

Environment: Azure Data Factory, Azure Databricks, ADLS, SQL Server, Azure DevOps

- Designed and developed ADF pipelines to ingest data from on-premises SQL Server and REST API sources into ADLS, supporting reliable source-to-lake ingestion.
- Built PySpark transformation notebooks in Databricks for data cleansing, standardization, and loading into analytical layers.
- Participated in code reviews, sprint planning, and technical documentation as part of an Agile delivery team.

EDUCATION

Bachelor of Technology (B. Tech) — Nalla Malla Reddy Engineering College
